

The Hill Laboratories

# Dermatology Chair

Working closely with dermatologists, Hill Laboratories, a manufacturer of tables since 1945, has designed an ideal chair for dermatology. From the basic chair to one encompassing many of the optional features, model 90D provides versatility at the most affordable price. Hill Laboratories will also customize a table to meet your specific needs.

## Standard Features

- 22"-35" high, 24" or 26" wide cushions
- Electric lift-back with radius top
- Flat cushions (contour optional) 1" soft foam overlaying 1 1/2" medium density foam
- Full-width foot cushion with manual adjustable tilt
- Paper retainer on headpiece
- Paper roll holder on foot cushion
- Choice of 20 vinyl colors
- Beige or gray powder coated base with thermo-plastic skirting
- One-year warranty on parts & labor

Shown with optional contour seat

## Patient Positioning

### Adjustable Height

Reduce back strain by positioning the 90D at the ideal working level with electric adjustable height from 22" to 35"

### Electric Tilt and Foot

For ultimate patient comfort and positioning, the 90D can be equipped with optional Trendelenburg and electric foot section.

### Full Recline

The 90D can be fully reclined for face-up or face-down procedures. Hill Laboratories even offers a soft-foam headpiece with face cut-out for optimum patient comfort.
